Wojciech Dolibóg

I build software that works.

dolibog.top | wojt707 | wdolibog | dolibog.wojtek@gmail.com | +48 534 336 807

About

As a software developer exploring various technical fields, mainly full-stack development and machine learning, I focus on writing clean code. I don't pretend to know everything, but I know how to find the answers and I work hard to solve the problems. I'm excited to keep learning and taking on new challenges.

Education

UNIVERSITY OF PORTO

September 2025 - February 2026 | Porto, Portugal

International mobility program, Data Science

SILESIAN UNIVERSITY OF TECHNOLOGY

March 2025 - June 2026 | Gliwice, Poland

Master of Science in Data Science (conducted in English)

October 2021 - February 2025 | Gliwice, Poland

Bachelor of Science in Informatics (conducted in English)

Experience

EY GDS | Software Developer

May 2025 – Present | Remote

- ➔ Developing and maintaining full-stack applications using Angular, TypeScript, Python (FastAPI), and PostgreSQL, focusing on design patterns and clean architecture.
- ➔ Deploying and managing containerized services with Docker and Kubernetes, contributing across the stack to deliver production-ready solutions.

FAGOR ARRASATE | Automation Engineer

July 2024 - September 2024 | Lawrenceburg, TN, United States

- ➔ Installing and commissioning control systems at customer facility, ensuring smooth integration and functionality.
- ➔ Programming PLCs, HMIs and SCADA systems, supporting customers on-site and upgrading solutions.

O&S COMPUTER-SOFT | Software Developer

July 2023 | Radzionków, Poland

- ➔ Building core modules of an ERP web system using Java (Spring Boot), Angular, and MySQL.
- ➔ Collaborating in an agile team to deliver stable, maintainable software through iterative improvements.

QUERIS | Frontend Developer

July 2019 - August 2019 | Piekary Śląskie, Poland

- ➔ Developing a production optimization web dashboard using Angular, TypeScript, HTML, and CSS, aimed at improving efficiency of manufacturing processes.
- ➔ Actively participating in code reviews, contributing to an improvement in overall code quality and maintainability.

Projects

MIDI FORGE | React, Typescript, TailwindCSS, Shadcn-ui, Python, PyTorch, Flask

AI-powered piano music generation tool. It utilizes a custom-trained LSTM model to generate MIDI compositions based on user-specified parameters such as genre, tempo, length and randomness.

CLINIC MANAGEMENT | React, Typescript, TailwindCSS, Shadcn-ui, Java, JWT

A role-based clinic management web app with authentication and dynamic UI based on user roles (receptionist, doctor, lab assistant, lab supervisor, admin). Features include, among others, patient registration, visit scheduling, physical examinations, lab test processing and validation.

DRIVER IN THE LOOP | Python, ROS, Raspberry Pi, Carla Simulator, Ubuntu

A vehicle motion simulation system linking a physical test stand with a virtual environment. Uses Carla Simulator to capture vehicle dynamics and control a scaled model via servos and motors, enabling real-time driver interaction.

BIPEDAL WALKER TD3 | Python, PyTorch, Gymnasium, TD3 (Twin Delayed DDPG)

Reinforcement learning project training a Bipedal Walker agent using the TD3 algorithm in the Gymnasium environment aimed at improving stability and motion of the agent.

ESCAPE THE MAZE | C++, SFML, Finite State Machine

A maze escape game built with C++ and SFML, using a finite state machine for game logic. Players navigate increasingly larger mazes, solving challenges to advance through levels.

Skills

Frontend: Angular, React, Next.js, Vite, TypeScript, HTML5, CSS3, TailwindCSS, RxJS, Redux
Backend: Python (FastAPI, Flask, Django), Java (Spring Boot), REST APIs, SQL, PostgreSQL, MySQL, ORM, Redis
AI & Data: PyTorch, Scikit-learn, NumPy, Pandas
DevOps (basics): Docker, Kubernetes, CI/CD, Cloud Computing (GCP, AWS)
Tools & Practices: Git, GitHub/GitLab, Agile (Scrum), Object-Oriented Design, Clean Architecture, Design Patterns, Unit and Integration Testing, Debugging
